Chief, Signal Center

SIGHUAD

25 YEAR RE-REVIEW

25X1 It is requested that necessary action be taken to convert the [] circuits from SIGTOT to SIGHUAD. It is felt that this conversion is justified for the following reasons:

a. SIGHUAD has proven faster and more efficient and with the large increase in traffic handled on the circuits a large amount of operator time would be saved.

25X1 b. Under the present procedures if the SIGHUAD becomes inoperative there is no alternate channel available. Because of security considerations Republic traffic cannot be transmitted over the [] circuits.
